

When one decides to seriously collect Canadian stone ginger beer bottles, one is then faced with the decision of what bottles to actually collect. Whether by geographic location (ie. province), designs (ie. animal transfers) or manufacturer (ie. bottler or pottery house), there is a potential of several thousand different bottles across Canada to add to one's collection. Maritime bottles are popular because of their number and difference in designs. As well, many brewers used a number of different bottles and designs over the years in their businesses. Some even dated their bottles each year. Due to the British army and navy presence there were many brewers in various maritime seaports.

The following list of New Brunswick bottle companies by town or city while extensive is not complete as I am sure there are others which have not come to light at this time. Also in relation to other parts of Canada, there was a higher use of debossed blob top primitives used in the Maritimes, especially in New Brunswick.

Fredericton

- S.H. McKee & Son (*Bottles dated, "S.H. McKee" was earlier predate*)
- Enterprise Bottling Co. – King Ginger Beer (*Two out of three bottles dated*)
- Harland (*Rare*)
